

Scapa 6022

PVC Adhesive Plasticised Tape

DESCRIPTION

PVC tape with a PVC, plasticised 12/100mm self extinguishing backing and rubber adhesive system. Available in 17 colours (Black, White, Grey, Iso Grey, Red, Blue, Yellow, Brown, Dark Green, Orange, Cream, Violet, Yellow/Green stripe, Light Green, Transparent, Olive Green and Silver).

APPLICATIONS

- Identifying wires and electrical cables
- Insulating wires, cables and electrical equipment
- Making and identifying cable bundles

FEATURES AND BENEFITS

- Very good electrical properties
- Tough, flexible and conformable
- Highly aggressive adhesive system
- Good resistance to chemical agents
- Cold resistant to +5°C
- Flexible and conformable backing
- Lead free
- Conforms to BS3924
- Approved by IMQ, VDE, ÖVE, SEMKO, NEMKO, DEMKO
- Bar code on each individual coil

TECHNICAL PROPERTIES

	UNIT	TYPICAL VALUE	TEST METHOD
Total Thickness	mm	15/100	AFERA 4006
Tensile Strength	daN/cm	2.5	AFERA 4004
Elongation	%	200	AFERA 4005
Adhesion on Steel	cN/cm	220	AFERA 4001
Thermal Class Continuous	°C	80	

STANDARD PRESENTATION

- Roll length: 10 – 25 m
- Roll width: 12 to 100 mm
- Core: 37 mm

RECOMMENDATIONS

The rolls should be stored upright in the original packaging and protected from moisture and direct sunlight. Storage temperature between +5°C and +25°C. Although the functional performance of the material will remain unchanged for a prolonged period, application characteristics and appearance may change. We recommend, therefore, that the product is used within 2 years of receipt.
